WHAT OUR CUSTOMERS SAY

"At first we tried to develop an in-house database system to track equipment and electronic tickets. Development lasted over four years, but we needed a product that could fully support what we do. And RigER did exactly that.

We chose RigER because it met a lot of our needs for Equipment Tracking, Proposal Development and Electronic Field Ticket generation.

And one of the main key factors in our decision was the ability to customize the RigER platform to match up with Vapor Point work processes."

Sean Kirkpatrick, COO
Vapor Point, LLC
